

To access your HOME Directory and Department SHARE in a Mac.
Prerequisites: You need to have the MACOSX KERBEROS CLIENT already installed in your Mac.

Step 1.

A.- Download and install the CISCO VPN client for the MacOSX.
(and if needed, install the KERBEROS FIXER, which will install the Kerberos client in your machine)

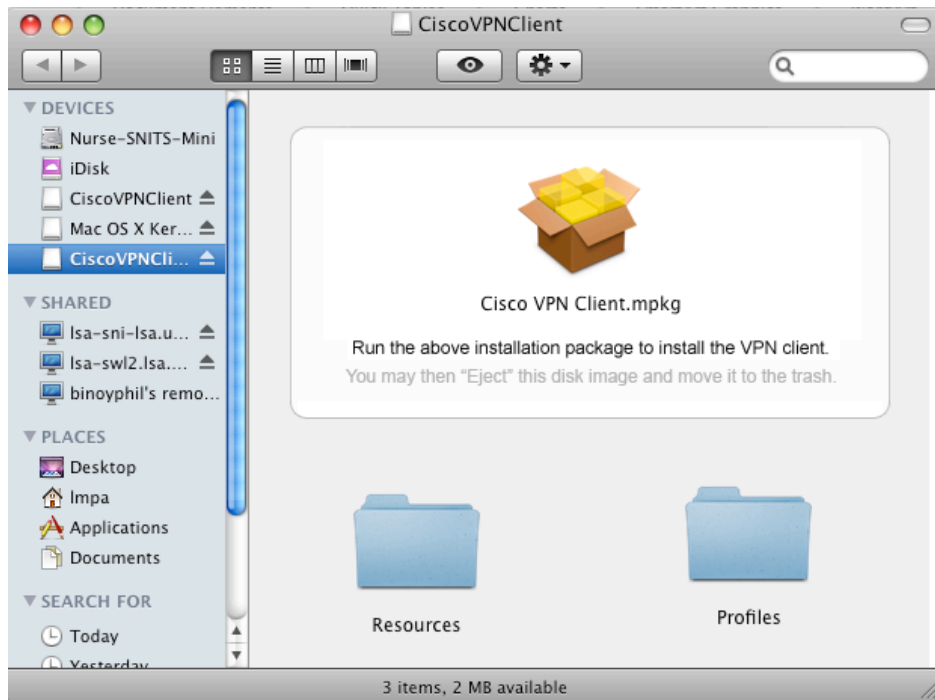

<http://www.itcs.umich.edu/bluedisc/>

B.- Select the Operating system in your computer,
--you will be prompted to provide your Kerberos credentials.
Once the site opens, you will see the following window:

C.- Download the Kerberos Fixer and the Cisco VPN client to your computer.
(the downloads will open the following 2 windows, just follow the instructions after double clicking on each installer)

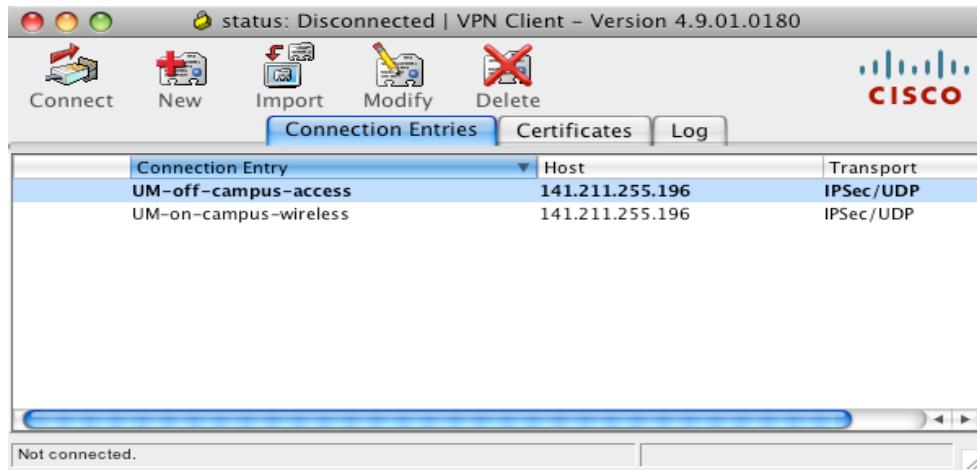

D.- The Kerberos client will ask you --during the installation-- if you want to place its ICON on the DOCK, we recommend that you click "yes" for easy access. **
Additionally, you can also place the icon for the VPNCLIENT on the DOCK as well. **

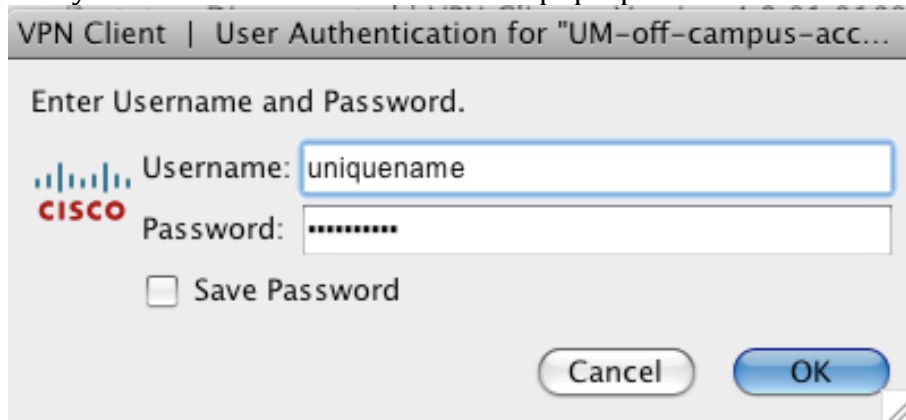

Whenever you need access to the School of Nursing shares, you will need to activate both client prior to connecting to the shares.

Step 2.

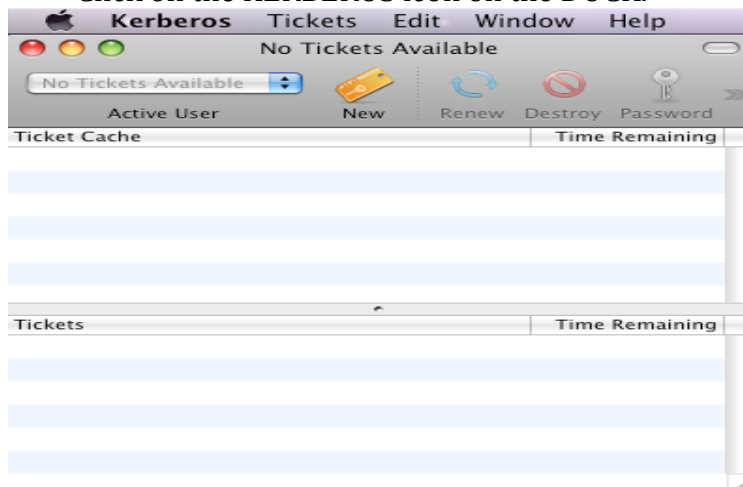

A.- Go to the APPLICATION folder and run the VPNClient. (see below) or
Click on the VPClient icon on the DOCK. **

Make the appropriate selection above and provide your UofM Kerberos credentials.
Click OK, (once your credentials are validated the pop-up window below will disappear)

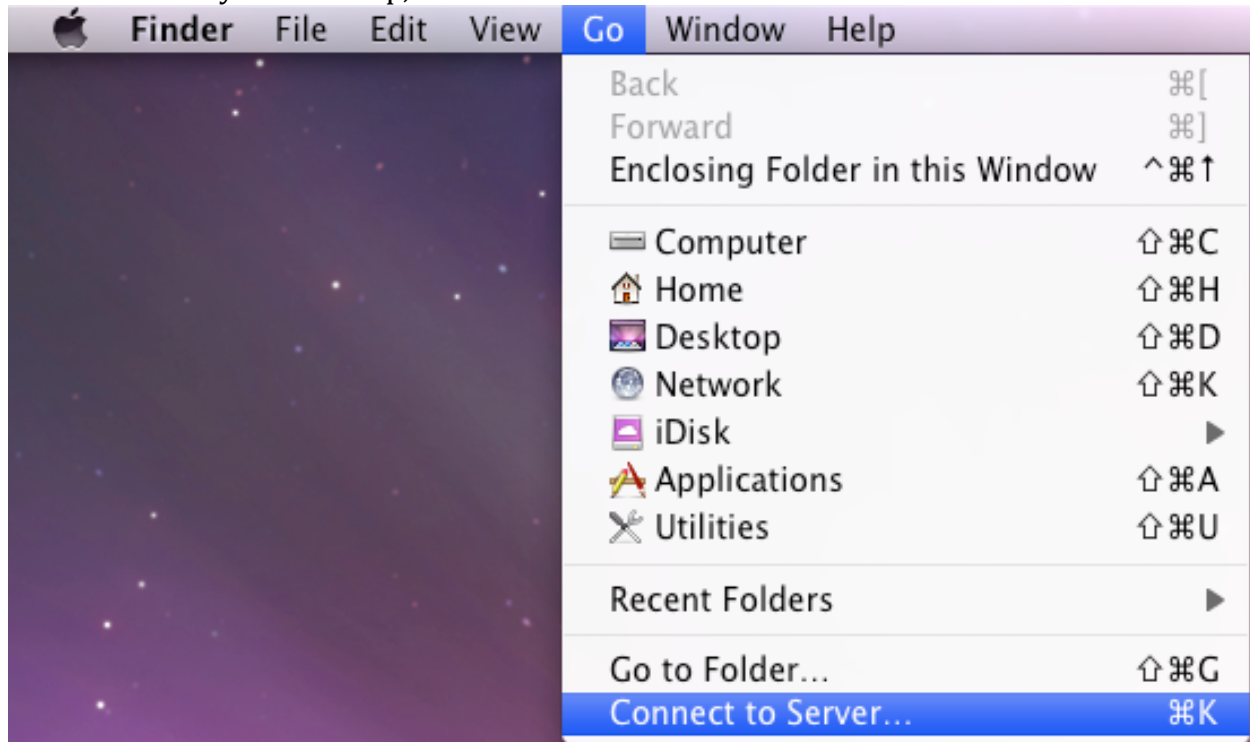

B.- Go to the APPLICATION / UTILITIES folder and run KERBEROS (see below) or
Click on the KERBEROS icon on the DOCK. **

Click on NEW to obtain Kerberos credentials.

Step 3.

A.- Go to your Desktop, click on the GO Menu and select CONNECT TO SERVER

B.- On the CONNECT TO SERVER window type in the following:

smb://cifspilot.umich.edu/nur/group

for the School of Nursing Departmental Share (S:\ Drive in PCs)

or

smb://cifspilot.umich.edu/nur/users/"your-username"

for your Home directory at the SON Shares (H:\ Drive in PCs)
